Microsoft Share Point

ITHelpline

Organizations use Microsoft SharePoint to create websites. You can use it as a secure place to store, organize, share, and access information from any device. All you need is a web browser, such as Microsoft Edge, Internet Explorer, Chrome, or Firefox.

SharePoint Products & Technologies:

- SharePoint in Microsoft 365
- SharePoint Server
- OneDrive sync
- SharePoint Framework (SPFx)
- Power Platform Integration

Plans:

- Plan 1
- M365 Business Standard

Microsoft Projects

IT Helpline

Microsoft Project is project management software that's used to create schedules, project plans, manage resources and keep track of time. It has features such as Gantt charts, kanban boards and project calendars for project management professionals.

Service Portfolio:

- MS Project Consulting
- MS Project Report Designing
- MS Project Collaboration Setup
- MS Project Integration
- Microsoft Project Workflow Design & Automation
- Microsoft Project Customization
- MS Project Setup & Administration
- MS Project Training & Coaching
- MS Project Backup & Restore

Plans:

- Plan 1
- Plan 3
- Plan 5

Power BI

Power BI is a collection of software services, apps, and connectors that work together to turn your unrelated sources of data into coherent, visually immersive, and interactive insights. Your data might be an Excel spreadsheet, or a collection of cloud-based and on-premises hybrid data warehouses. Power BI lets you easily connect to your data sources, visualize and discover what's important, and share that with anyone or everyone you want.

Services:
- Interactive Dashboard
- Smooth Integration
- Personalized Solutions
- Timely Support and Training
- Security and Compliance
- Continuous Innovation
- Cost-Effective Solutions

Plans:
- Power BI Pro
- Power BI Premium Per User
- Power BI in Microsoft Fabric

Microsoft Power Apps / Power Automate

- Using Power Apps, you can quickly build custom business apps that connect to your data stored either in the underlying data platform (Microsoft Dataverse) or in various online and on-premises data sources (such as SharePoint, Microsoft 365, Dynamics 365, SQL Server, and so on)

- Microsoft designed the software to help users automate mundane, manual processes in both Microsoft Office 365 and Microsoft Azure, with the final goal being boosting productivity. Power Automate is enabled by default in all Office 365 applications and comes with about 150 standard connectors.

Power App Services:

- Custom Application Development
- External Sources Integration Services
- Mobile Friendly App Development
- Workflows Automation Services
- Canvas App & Model Driven App Development
- Powerapps Integration With Sharepoint

Plans:

Power Automate Premium
Power Automate Process

Plans:

Power Apps Premium

Microsoft Security & Compliance

- Secure organization with Microsoft Security solutions, ensuring that your organization stays secure in the ever-changing landscape of cybersecurity.

- Secure your most important Data with Microsoft Purview. Safeguard your data across clouds, devices, and other platforms to be more efficient and reduce security and compliance costs.

Microsoft Security Services Portfolio

- Microsoft Intune
- Microsoft Defender for Endpoint
- Microsoft Defender for Office 365
- Microsoft Defender for Cloud Apps
- Microsoft Defender for Identity
- Azure Information Protection
- Azure Cloud Security
- Microsoft Sentinel
- SOC Solution

Microsoft Purview Services Portfolio

- Customized Governance Policies
- Data Cataloging and Metadata Management
- Access Controls and Security
- Data Quality Monitoring and Issue Resolution
- Compliance and Regulatory Support
- Data Lineage and Impact Analysis
